

HARINI DASARI

AI/ML Engineer | Computer Vision & Deep Learning Enthusiast

dasariharini17@gmail.com — [+91 8639762217](tel:+918639762217) — [GitHub](#) — [LinkedIn](#)

Career Objective

Aspiring AI/ML engineer and research enthusiast with hands-on experience in machine learning, deep learning, and NLP. Experienced in building data-driven applications for real-world problems, with a strong interest in computer vision and AI-driven systems. Focused on developing scalable and impactful solutions in healthcare and related domains.

Education

Rajiv Gandhi University of Knowledge Technologies (RGUKT), RK Valley

B.Tech in Computer Science and Engineering 2023 – Present

CGPA: 8.8 / 10

Pre-University Program (MPC)

2021 – 2023

CGPA: 9.8 / 10

Projects

LifeBand Maa – AI-Based Maternal Health Monitoring System Nov 2025 – Present

Startup-oriented AI solution for real-time maternal health monitoring and emergency response

- Built an AI system to monitor vital signs of pregnant women (BP, ECG, temperature) in real time.
- Used anomaly detection to identify risks and send emergency alerts to doctors and family.
- Developed a live dashboard for remote monitoring and timely medical intervention.

AI for Rural Health – Symptom Analysis & Risk Prediction System Feb 2026 – Present

AI Healthcare Risk Prediction Platform — [Live Demo](#)

- Built an AI system that analyzes symptoms and generates a risk score to predict health severity.
- Provided recommendations such as self-care, doctor consultation, or hospital visit based on risk level.
- Integrated ASHA workers to digitally connect rural patients with doctors for remote healthcare support.

Safe Yathra – AI-Based Route Safety Analysis System

Feb 2026 – Mar 2026

Smart Route Safety Prediction and Visualization Platform

- Visualized safety levels on maps for easy understanding during travel.
- Built an ML-based system to classify routes into safe, moderate, and unsafe zones using location data.
- Integrated nearby services like police stations, hospitals, and petrol bunks for user safety.

Praja FIR – Voice-Based Digital FIR Filing System

Mar 2026 – Present

Multilingual AI System for Easy Complaint Registration — [Live Demo](#)

- Developed a voice-based multilingual AI system for filing FIRs in native languages using speech recognition and NLP.
- Converted speech into structured digital FIRs for reading and verification.
- Enabled cross-language translation for seamless FIR understanding and sharing across states.

Technical Skills

Programming Languages: C, Python, Java, JavaScript

Machine Learning & Deep Learning: Supervised Learning, Unsupervised Learning, Feature Engineering, Model Evaluation, Neural Networks, CNNs, Hyperparameter Tuning, Regularization

Web Development: HTML, CSS, React.js, Node.js, Express.js

Databases: MySQL, MongoDB, Supabase

Libraries & Frameworks: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, TensorFlow

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Vercel, Render

Achievements

- Qualified **GATE 2026** (Computer Science and Engineering).
- Won **First Prize** at Police Hackathon for developing "Praja FIR", a digital FIR filing system.
- Presented "LifeBand Maa" at PitchTank, Blueprint 6.0, and Techzite 2.0.
- Won **Aadhya Hackathon 2K26** among 60+ teams for "SymptomScan AI".
- Secured **Top 10 position** at Everest Engineering Hackathon among 100+ teams.
